calling the light of the light o

Having read recently that there are more neurons in the human brain than there are stars in the Milky Way, and having read any number of times that the human brain is the most complex object known to exist in the universe, and that the mind is not identical with the brain but is more mysterious still, it seems to me this astonishing nexus of self, so uniquely elegant and capable, merits a name that would indicate a difference in kind from the ontological run of things, and for my purposes "soul" would do nicely.

I change the property of the second s
